

Ozone Generators

Ozone is a powerful disinfectant that can be used to maintain a clean and stable environment in both marine and fresh-water systems. Integrated-Aqua offers a complete line of Clearwater Tech ozone generators, cabinets, oxygen preparation systems and ozone accessories to fit any application.

Benefits

- **Maintain Crystal Clear Water Quality:** Ozone both disinfects and oxidizes pollutants resulting in crystal clear and stable water quality which promotes a healthy and clean appearance in a wide range of aquatic applications.
- **Quality Performance & Service:** With over 20 years of experience designing and manufacturing ozone systems, Clearwater Tech ozone systems are the premier brand in ozone technology. We provide superior service to our clients to ensure project success.
- **Ease of Installation:** We supply all the required pre-engineered components in the system to make the installation on-site very easy so you can put the system into service quickly. Systems are available in Builder Packages (Apex, Wall-Mount) or integrated turnkey skid-mounted systems.

Market Applications

- Aquatic Animal Life Support
- Water Features & Koi Ponds
- Aquaculture
- Bottled water
- Pools (commercial & residential)

PRODUCTS

The Apex Builder™ product line is our most affordable and scalable ozone packages available and includes pre-engineered ozone components designed to meet customer specifications that can easily be installed on-site. The Apex Builder™ can be wall mounted, ready to tie to existing pump lines with systems, and have an output range from 800

mg/hr to 15g/hr.

Wall Mount Ozone Generators: Ideal for light to medium-scale commercial applications that require higher doses of ozone at a competitive price. Systems are designed to meet customers' specifications, water quality, and site requirements. CD Series ozone generators

range from 1.3 g/hr to 27 grams/hr.

Skid Mounted Systems: For customers looking for integrated ozone packages, our Self-Contained ozone systems and Skid-Mounted ozone systems offer a turnkey solution to any size project. Cabinet systems are available for larger projects with output ranges from 28-170 g/hr ozone.

PERIPHERAL EQUIPMENT & ACCESSORIES

Air Preparation Systems: Oxygen concentrators almost triple the amount of ozone produced from the same generator! Air Dryers are required for most ozone systems.

Monitoring & Control Equipment: Measure ambient ozone, dissolved

ozone, ORP, pH, with our high quality monitoring equipment and controls.

Venturi Injector

Manifold Assemblies: Pre-engineered with bypass valving to eliminate guesswork and reduce installation time.

Contact Tanks & Accessories:

Increase ozone transfer with the ozone compatible contact links. Available with off-gas vents, and ozone catalytic destruct.
